

Drive online payments growth, securely.

| TSYS InterActivSM ACS |

Benefit from the new EMV® 3-D Secure standard to authenticate online transactions more effectively.

Financial institutions and merchants are looking for tools to help drive online growth and combat e-commerce fraud.

Based on the new EMV 3-D Secure standard, TSYS InterActiv ACS protects issuers and cardholders against card-not-present (CNP) fraud by supporting authentication processing for in-app purchases and traditional browser-based e-commerce transactions.

WHY YOU NEED IT

- Reduce fraud and liability with a growing base of 3-D Secure transactions
- Support all major payment schemes on both 3-D Secure v1 and the new 3-D secure v2 protocol
- Provide PSD2-compliant, strong customer authentication processing with support for one-time passwords or 3-D Secure biometric authentication for faster check-out. Facilitate out-of-band authentication
- Support PSD2 merchant whitelisting with trusted beneficiaries for frictionless flow and dynamic linking for payment service added security
- Support multi-lingual web screens for web browsers and mobile application RESTful APIs, to ensure uninterrupted purchases across devices and an optimal customer experience
- Benefit from enhanced data set to support internal, or external, risk-based assessment for frictionless authentication requirements and decisioning

TSYS INTERACTIV™ ACS

HOW IT WORKS

- Works with PRIME IssuerSM card management solution (web-based customer screens and back-end system) or external card management systems via an integration interface
- Works with PRIMESM Alerts notification service
- Includes authentication page templates for browser based purchases or APIs to support in-app purchasing
- Supports transaction history, search and auditable system logs
- Supports digital certificate and hardware-encrypted key management utility
